

iScan80 Comprehensive

3d Retina

Retinal analysis and 3D imaging

Retinal imaging capabilities include retina mapping with normative comparison and a 3D retina scan with en face presentation, which enables virtual retinal dissection by displaying three different reference planes: ILM, IPL and RPE.

3d Optic Disc Scan

In-depth 3D optic disc analysis

GCC analysis helps identify ganglion cell loss, which sometimes precedes RNFL loss. 3D disc scan depicts the optic nerve in cross section with the representative thicknesses of selected slices.

12mm Radial Scan

Enhanced Depth

12mm widefield scan with enhanced depth imaging mode provides high resolution views.

Anterior Segment Angle With Measurement

Additional capabilities

All iScan80 systems feature Optovue's exclusive iWellnessExam. iScan80 Comprehensive includes Cornea Advance anterior segment imaging features such as pachymetry mapping and a variety of corneal and angle measurement tools.

iScan80 specifications

Scanner

OCT Image	80,000 A-scan/second
Depth Resolution (in tissue)	5.0 µm
Transverse Resolution	15 µm (retina)

Scan Range

Depth	2 - 2.3mm (retina)
Scan Beam Wavelength	840nm (+/-10nm)

OCT Fundus Image (En Face)

FOV	(H) 21° x (V) 21°
Minimum Pupil Diameter	2.0mm
External Image (Live IR) FOV	13mm x 8mm

Size

Dimensions (in.)	(W) 19.81 x (L) 15.83 x (H) 17.82
Weight (lb.)	42.94

Our vision is foresight

Since 2006, Optovue has been a leading provider of OCT technology for ocular diagnostic imaging, having installed more than 15,000 systems on six continents.

Optovue is focused on furthering the science, efficacy and clinical application of OCT for enhanced eye health, and continuing to build upon our history of OCT patents and firsts.

Not surprisingly, this specialization has yielded a history of OCT patents and firsts.

Our mission is your success

To unleash the full potential of OCT in your practice, Optovue puts its comprehensive OCT resource center at your disposal:

- *The Academy at Optovue* brings OCT education to your computer and mobile screens to help you interpret images, understand reports, apply the information to clinical practice—or help your staff become better OCT operators.
- *Training and Support* starts with professional installation and in-office staff training from your dedicated Optovue clinical applications specialist and goes on to include five years of free phone and online support.
- *Free Software Updates* that improve system usability and efficiency throughout your instrument's operational lifetime are included with every iScan80 system. Major software upgrades may be available for purchase.

Bottom line, when you invest in iScan80, you also secure a valuable OCT practice partner.

Put Optovue foresight to work in your practice today

For a complimentary practice consultation or iSeries system demonstration call 1.510.623.8868 or visit optovue.com.

iScan[®]80
OCT System

iScan80® OCT

The OCT that practically runs itself

Introducing the next-generation iScan—where advanced scanning is realized in a system so user-friendly it even talks to patients. Meet **iScan80®**, the high-speed 80kHz OCT that sets the standard for efficiency—perfect for ECPs seeking an affordable and versatile OCT system. It's ideal for practices with limited staff since **iScan80** delivers consistent scan acquisition with minimal training—and vocally guides patients through an entire exam in any of 12 languages. The new **iScan80** delivers the following advancements:

- 80,000 A-scans per second – 3x faster than the original iScan OCT
- Simplified scan acquisition
- New reports and wider field of view

Compact and portable, **iScan80's** streamlined design integrates the operator interface, display, patient interface and scan head into one console that can be moved from station to station and mounted on any tabletop. Then comes the easy part—plug in, switch on and start scanning.

iScan80 Comprehensive Capabilities

iScan80 Comprehensive includes:

- OCT iWellness scan
- Retina mapping
- RFNL and GCC® trend analyses
- FLV% and GLV% analysis to increase GCC sensitivity and specificity
- High-density 3D retinal imaging
- In-depth 3D optic nerve head analysis
- Cornea Advance anterior segment imaging and measurement

iWellness

The OCT iWellness scan is an Optovue exclusive that uses quick, easy OCT scan to promote better overall patient eye health. Its utility stems from a single, comprehensive report that shows:

- Retinal thickness and GCC thickness with normative comparison
- Symmetry analysis
- FLV% and GLV%, proprietary Optovue GCC metrics that provide important information to aid in glaucoma diagnosis and management
- Eight high-resolution B-scans

Retinal thickness map uncovers thinning and thickening

GCC map can reveal GCC thinning

ETDRS diagram shows average retinal thickness by zone as compared to the normative database

Optovue's exclusive FLV% and GLV% provide valuable data points to aid in the prediction of visual field conversion in glaucoma suspects¹

OCT iWellness Benefits Patients

The OCT iWellness program benefits patients by helping them become more involved in their own eye health. The scanning process is simple and quick, and each patient receives comprehensive, personalized eye health information in an easy-to-understand report.

OCT iWellness Benefits Eye Care Providers

OCT iWellness benefits ECPs by providing a valuable assessment tool that can reveal the need for more extensive imaging. It also streamlines the exam process by quickly confirming normal—or helping you more efficiently diagnose pathology. Optovue's current iWellness users have affirmed that the OCT iWellness scan improves patient involvement, loyalty and retention. This helps you grow and differentiate your eye care practice, while also providing a new revenue stream.

Networking solutions

iScan80 provides comprehensive networking capabilities for the most effective and efficient OCT utilization. It stems from our NetVue product suite, which empowers you to receive, review and modify images wherever and whenever you choose. Capture new patient scans while existing scans are being reviewed. View and modify images from as many as 10 review stations. Access OCT images from your smart phone, tablet, laptop or desktop. NetVue makes such seamless workflow possible. Naturally **iScan80** is fully DICOM compatible.

Review station requirements

Operating System:	Win 10, 64 bit
Processor Speed:	Intel® Celeron (i7-8700T 2.40 GHz)
Computer RAM:	16 GB or higher
Network Bandwidth:	1Gbps or higher
Monitor Resolution:	24 in. 1920x1080 60Hz
